LAVA/F-7000 FALCON WATERFREE URINALS

Falcon Waterfree® urinal systems reduce water and sewer costs, lower maintenance and repair bills, and create more hygienic, odor-free restrooms. Our patented three part system, including vitreous china bowl, sloped housing and cartridge, eliminates the need for water, conserving up to an average of 40,000 gallons (150,000 liters) or more of water per urinal each year.

The Lava/F-7000 Waterfree urinal is made of vitreous china and is a wall hung, wall outlet unit. This waterless urinal features a patent-pending, splash-free design, contemporary styling and a mid-size wall footprint – making it ideal for retrofits and new construction. The Lava/F-7000 includes a special area for messaging, which can be used to describe environmental accomplishments for the facility or to generate advertising space. The Lava/F-7000 meets ANSI/ASME A112.19.19-2006 for vitreous china non-water urinals and is CSA approved. It also complies with the American Disabilities Act guidelines and ANSI A117.1 for accessible and usable buildings and facilities and with the International Plumbing Code, National Standard Plumbing Code and Uniform Plumbing Code requirements.

“Falcon Waterfree urinals are predicted to be 500 times more effective against back migration of sewer gases as compared to conventional P-trap water barriers.”

-Michael Hoffman, Ph. D
California Institute of Technology

BENEFITS

- Uses no water for operation
- Five times less bacteria than flush urinals
- Reduced water and sewer costs
- No costly flush valve or sensor repairs
- No replacement sealant costs
- Provides downhill flow, helps reduce clogs
- Minimal care and easy cleaning
- Improved hygiene and safety
- Dual barrier protection
- Odor-free
- Ideal for retrofit and new construction

FEATURES

- Touch-free operation
- Mechanical-free design
- Patented locking cartridge
- Maintenance-free cartridge
- Smooth, non-porous surface
- Vitreous china bowl
- Messaging/advertising space

SYSTEM INCLUDES

- Vitreous china bowl
- Installed cartridge housing
- Cartridge kit*
- Exclusive pipe-in-pipe technology*
- One-piece wall bracket with anchors*
- Drain line test cap*
- Uni-coupler*
- Installation Instructions

CARTRIDGE KIT* INCLUDES

- One sealed cartridge
- Pre-measured liquid sealant pack
- Installation key
- Disposal bag
- Plastic gloves
- Instruction sheet
